## **Calculation Policy**

Approved by the Teaching and Learning Committee on 8/11/2023.  
To be reviewed in the Autumn term 2026.

The Mathematics curriculum at St Simon's Catholic Primary school has been planned rigorously and carefully to support the school's key learning aims and includes the National Curriculum 2014 objectives.

The key focus of our mathematics curriculum is to ensure that all pupils:

- become **fluent** in the fundamentals of mathematics, including: numeracy, geometry, measurement, algebra, statistics, ratio and proportion.
- can **reason mathematically** by following a line of enquiry, establishing relationships and making generalisations as well as justifying their ideas using mathematical language with progressive precision.
- **solve problems** by applying their mathematical understanding to a variety of problems with increasing sophistication, including breaking down problems into a series of simpler steps and **resiliently** seeking solutions when problems have been presented in new ways.

To achieve this, children initially approach their work using concrete materials. Once confident they then begin to use pictorials to express their ideas before moving onto more abstract representations (digits). This progression is fundamental to foster a deeper understanding of the maths being learned.

Two key policies are crucial to supporting this progression:

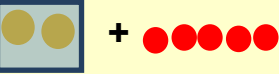

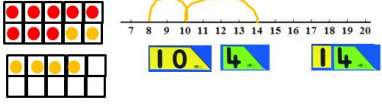

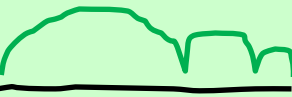

- **Maths Progression of Skills Documents from EYFS-Y6:** providing the year-group specific objectives across all areas of maths.
- **Calculation Policy:** providing the progressive methods to teaching the four operations (addition, subtraction, multiplication and division) in all year groups.

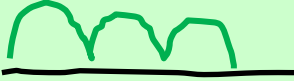

Each week, an explicit lesson focuses on mental arithmetic where the children solve questions using all four operations (+, -, x and ÷) and focus on using the most efficient methods (known as Big Maths). As the children progress through school they are expected to explain their answers in growing detail and are exposed to using more complex methods. The aim is to ensure that the fundamentals of our maths curriculum are known with such confidence that

Approved by the Teaching and Learning Committee on 8/11/2023.  
To be reviewed in the Autumn term 2026.

children can then apply them in a range of areas and to problems of growing complexity.

# Addition

<p><b>Year 1</b> Add and subtract one-digit and two-digit numbers to 20, including zero</p>	<p><math>2 + 5 =</math></p>  <p>Count out each set then find the total</p>	<p><math>2 + 5 =</math></p>  <p>Count on from first number (cover first number or display as numeral)</p>	<p><math>2 + 5</math> Leading to</p> <p><math>5 +</math> </p> <p><math>5 + 2</math> (without counters)</p> <p>Recognise the biggest number in the calculation and count on from it (using objects for smaller number if necessary)</p>	<p><math>2 + 5</math> <math>5 + 8</math> <math>4 + 13</math> <math>11 + 7</math></p>  <p>Recognise the biggest number in the calculation and count on from it mentally or using number line</p>	<p><math>6 + 8</math> becomes <math>8 + 2 + 4</math></p>  <p>Partitioning the smaller number and use the tens number to bridge calculation</p> <p><math>5 + 17</math> becomes <math>17 + 3 + 2</math></p>
<p><b>Year 2</b> Add and subtract numbers using concrete objects, pictorial representations, and mentally, including:  a two-digit number and ones  a two-digit number and tens</p>	<p><math>6 + 18</math> By counting on from the largest number</p> 	<p><math>6 + 58</math> By partitioning the smaller number through the multiple of 10</p> <p><math>58 + 2 + 4</math></p>  <p>58 60 64</p>	<p>TU + TU within 100</p> <p><math>37 + 44</math></p>  <p>44                      74    80 81</p> <p>Or</p> <p><math>40 + 30 = 70</math> <math>7 + 4 = 11</math> <math>70 + 11 = 81</math></p>	<p>Addition of three single digits – look for bonds you know and doubles</p> <p><math>6 + 9 + 3</math> <math>6 + 3 = 9</math> Double 9 = 18</p>	<p><b>Special cases + 9</b></p> <p><math>9 + 33</math></p>  <p>33                                      42 43</p> <p><b>Using Doubles</b> <math>29 + 30</math> is the same as <math>30 + 30 - 1</math></p>

<p>two two-digit numbers</p> <p>adding three one-digit numbers</p>	<p><b>30 + 46</b> By counting on in tens</p>  <p>46 56 66 76</p>	<p><b>22 + 50</b> By counting in groups of ten and one from largest number</p>  <p>50 70 72</p>	<p>Or</p> <p><math>44 + 40 - 3 = 81</math></p> <p><b>Recall of facts to 20 and by recall of adding multiples of 10 will support this thinking</b></p>		
<p><b>Year 3</b></p> <p>Add and subtract numbers mentally, including:</p> <ul style="list-style-type: none"> <li>□□ a three-digit number and ones</li> <li>□□ a three-digit number and tens</li> <li>□□ a three-digit number and hundreds</li> </ul> <p>Two 2-digit numbers across 100 (non-statutory guidance)</p> <p>Add and subtract numbers with up to three digits, using formal written methods of columnar addition and subtraction</p>	<p><b>Partitioning</b> the numbers for TU + TU across 100</p> <p><b>55 + 78</b> <math>70 + 50 = 120</math> <math>8 + 5 = 13</math> <math>120 + 13 = 133</math></p> <p><b>55 + 78</b> <math>78 + 50 = 128</math> <math>128 + 2 + 3 = 133</math></p> <p>Recall of facts to 20 and by adding multiples of 10 will support this thinking</p>	<p><b>Special cases</b></p> <p><b>66 + 79</b> <math>80 + 66 - 1 = 145</math></p> <p><b>Using doubles</b></p> <p><b>76 + 78</b> Double 70 + double 6 + 2 Double 70 + double 8 - 2</p> <p>Recall of facts to 20 and by adding multiples of 10 will support this thinking</p>	<p><b>Partitioning</b> Adding ones and tens to a 3digit number</p> <p><b>356 + 8</b> <math>356 + 4 + 4 = 364</math></p> <p><b>356 + 70</b> <math>350 + 70 + 6 = 420</math></p> <p><b>356 + 600</b> <math>300 + 600 + 56 = 956</math></p>	<p><b>Addition of three digit + 2 digit numbers and 3-digit + 3 digit</b></p> $\begin{array}{r} 268 \\ \underline{79} \\ 200 \\ 130 \\ \underline{17} \\ 347 \end{array}$ $\begin{array}{r} 268 \\ \underline{179} \\ 17 \\ 130 \\ \underline{300} \\ 447 \end{array}$	<p>Addition of numbers with decimal places</p> <p><b>1.5 + 1.5</b> Double 1 and double 0.5</p> <p><b>1.6 + 1.7</b> <math>1.7 + 0.3 + 1.3 = 3.3</math></p>

Approved by the Teaching and Learning Committee on 8/11/2023.  
To be reviewed in the Autumn term 2026.

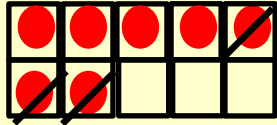

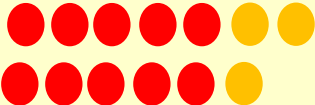

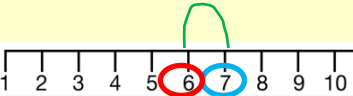

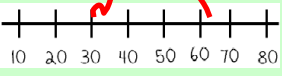

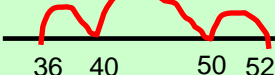

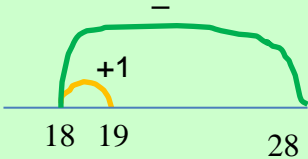

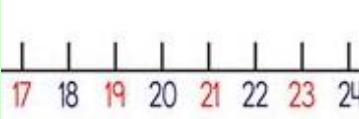

<p><b>Year 4</b> Add and subtract numbers with up to 4 digits using the formal written methods of columnar addition and subtraction where appropriate</p>	<p><b>Using mental strategy where appropriate</b></p> <p><b>1460 + 499</b></p> <p>1460 + 500 – 1 = 1959</p> <p><b>2560 + 3570</b></p> <p>6000 + 130 = 6130</p>	<p><b>Addition of three digit + 3-digit and four digit + four digit</b></p> $\begin{array}{r} 576 \\ 369 \\ \hline 945 \\ \small{1\ 1} \end{array}$ $\begin{array}{r} 7268 \\ 5179 \\ \hline 12447 \\ \small{1\ 1\ 1} \end{array}$	<p><b>Addition of numbers to 2 decimal places</b></p> $\begin{array}{r} 4.45 \\ 3.55 \\ \hline 8.00 \\ \small{1\ 1} \end{array}$ $\begin{array}{r} 57.89 \\ 46.67 \\ \hline 104.56 \\ \small{1\ 1\ 1\ 1} \end{array}$		
<p><b>Year 5</b> Add and subtract numbers mentally with increasingly large numbers e.g. 5-digit – 4-digit multiple of 10</p> <p>Add and subtract whole numbers with more than 4 digits, including using formal written methods (columnar addition and subtraction)</p>	<p><b>Using mental calculation by counting on</b></p> <p><b>45678 + 3500 = 49178</b></p> <p>45678 + 3000 = 48678</p> <p>42678 + 500 = 49178</p> <p><b>5.78 + 2.45 = 8.23</b></p> <p>5.78 + 2 = 7.78</p> <p>5.73 + 0.4 = 8.18</p> <p>5.33 + 0.05 = 8.23</p>	<p><b>Column addition</b></p> $\begin{array}{r} 58765 \\ 29648 \\ \hline 88413 \\ \small{1\ 1\ 1\ 1} \end{array} +$	<p><b>Mixed decimals</b></p> <p><b>57.89 + 46.6 + 23.785</b></p> $\begin{array}{r} 23.785 \\ 57.89 \\ 46.6 \\ \hline 128.275 \\ \small{1\ 1\ 2\ 1} \end{array}$		

Approved by the Teaching and Learning Committee on 8/11/2023.  
To be reviewed in the Autumn term 2026.

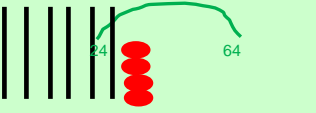

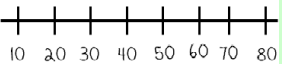

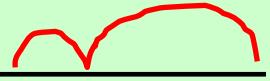

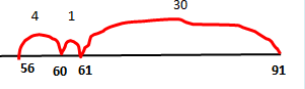

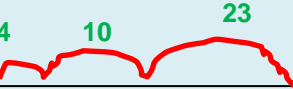

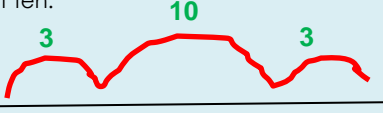

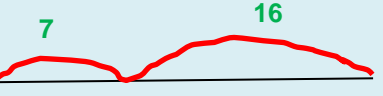

<p><b>Year 6</b> Perform mental calculations, including with mixed operations and large numbers</p>	<p><b>Partitioning</b></p> <p><math>4.578 + 0.008 =</math> <b>4.586</b></p> <p><math>6.568 + 0.079 =</math> <b>6.647</b></p> <p><math>6.568 + 0.07 = 6.638</math></p> <p><math>6.638 + 0.009 =</math> <b>6.647</b></p>	<p><b>Column addition with 5 or 6 digits</b></p> $  \begin{array}{r}  58765 \\  29648 \\  \hline  88413 \\  1111  \end{array}  +  $	<p><b>Using all 4 operations</b></p> <p><math>6 + 7 \times 8 = 62</math> because multiplication first then addition when there are no brackets</p> <p><math>2780 - 910 + 1220</math> can be reordered to <math>2780 + 1220 - 910 = 3090</math> as long as the symbol moves with the number</p>

# Multiplication

## Year 1

Solve one-step problems involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher.

Count in multiples of twos, fives and tens

There are two apples on one plate.  
How many apples on 3 plates?

## Year 2

Calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication ( $\times$ ), division ( $\div$ ) and equals ( $=$ ) signs

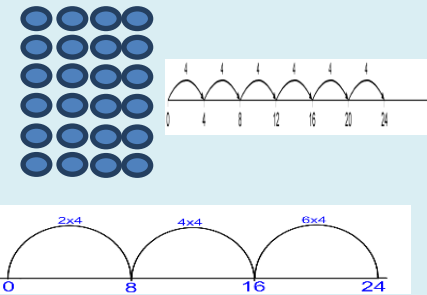

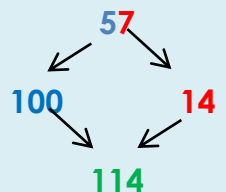

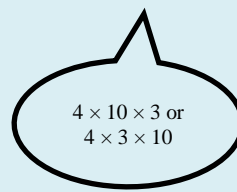

Recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers

**Recall and Derive doubles**  
 $7 + 7 = 14$   
 $7 \times 2 = 14$

**Recall and derive doubles**

# Division

**Year 1**  
Solve one-step problems involving multiplication and division, by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher.

There are eight oranges.  
Can you share them equally?

**Year 2**  
Calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication ( $\times$ ), division ( $\div$ ) and equals ( $=$ ) signs

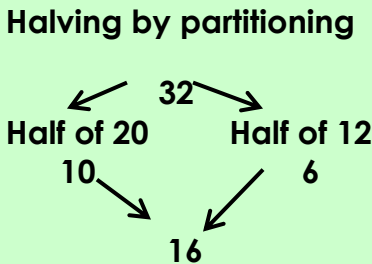

Recall and use multiplication and division facts for the 2, 5 and 10 multiplication tables, including recognising odd and even numbers

Relate division to counting and multiplication facts. Count in 5s to see that there are 4 5s in 20.

How many groups of five are there in 20?

**Recall and Derive Halves**  
Look at doubles of even numbers and seeing half of odd numbers as one left over or  $\frac{1}{2}$

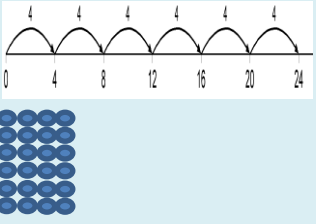

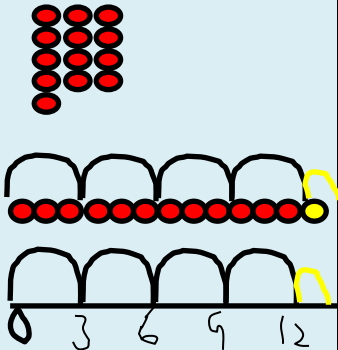

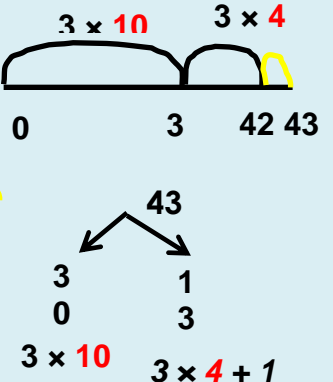

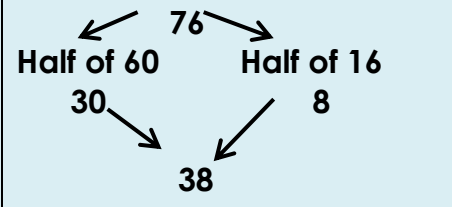

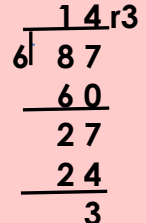

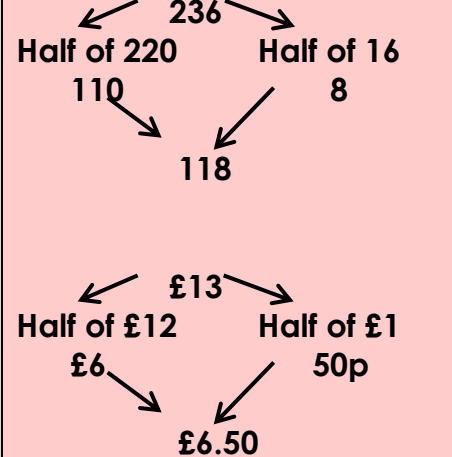

**Division by sharing**

$10 \div 5 =$

**Division by grouping**

$35 \div 5 =$

<p><b>Year 3</b></p> <p>Write and calculate mathematical statements for multiplication and division using the multiplication tables that they know, including for two-digit numbers divided one-digit numbers, using mental and progressing to formal written methods</p>	<p>Recall and use multiplication and division facts for the 3, 4 and 8 multiplication tables</p> <p>Use facts for numbers up to 10 times the divisor E.g. <math>28 \div 3</math> This is between</p> <p><math>27 \div 3 = 9</math> and <math>30 \div 3 = 10</math> So 9 remainder 1</p>	<p><b>Counting</b></p> <p>Relate division to counting and multiplication facts. Count in 4s to see that there are 6 4s in 24</p>  <p>Arrays show 6 groups of 4 so <math>24 \div 4 = 6</math></p>	<p><b>Division as grouping</b></p> <p><math>13 \div 3 = 4 \text{ r}1</math></p> 	<p><b>Division as grouping</b></p> <p><math>43 \div 3</math></p> 	<p><b>Halving by partitioning</b></p> 
<p><b>Year 4</b></p> <p>Use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together three numbers</p> <p>Divide two-digit and three-digit numbers by a one-digit number using</p>	<p>Division facts for multiplication tables up to <math>12 \times 12</math></p> <p>Use facts for numbers up to 10 times the divisor E.g. <math>75 \div 9</math> This is between</p> <p><math>72 \div 9 = 8</math> and <math>81 \div 9 = 9</math> So 8 remainder 3</p>	<p><b>Division as grouping</b></p> <p>Combine multiples of the divisor to support you</p> <p><math>87 \div 6 =</math></p> 	<p><b>Division by grouping leading to formal division</b></p> <p><math>87 \div 6</math></p> 	<p><b>Halving by partitioning</b></p> 	

Approved by the Teaching and Learning Committee on 8/11/2023.
